

About 2022 Summer Camp

Special Maths Academy (SMA) welcomes you to the Summer Camp where cool kids from all over the country gather to share their passion for mathematics. The students will get to rub minds, work on problem sets, and network with the most brilliant minds from all over Nigeria and abroad during the camp. The students representing Nigeria at International Mathematics Olympiad and Pan-African Mathematics Olympiad will be attending the summer camp. Your wards will get the opportunity to interact with them through our classrooms and online seminars organized during the camp.

This camp is designed to teach olympiad-level mathematics as well as instill other important skill sets that determine the success of a student; these includes but not limited to positive mindset, study strategy/tools, perseverance. We do this in order to maximize the learning outcome of our students. The participants leave our camps more inspired than they came in and we mentor them to take the strategies learned during the program and apply in other areas of their lives. Thus, creating a champion mindset out of each student.

Our mission at SMA is to build a sustainable ecosystem for the most talented Nigerian mathematicians; to mentor and nurture them from an early stage and become ready to participate in IMO/PAMO by the time they get to JSS3. Our aim is to build an army of IMO level problem solvers that can consistently obtain GOLD and SILVER medals thereby creating difficulty in selecting Nigerian teams for the various international competitions.

Categories

The camp program will be in two categories, namely:

- Pre-Olympiad
- Intermediate Olympiad.

After the student has registered, he/she will receive a confirmation email together with other details on how to enroll in the online classroom.

Schedule

In-class live (zoom) sessions of 90 minutes daily from Monday to Wednesday.

Junior Category: 2pm - 3:30pm GMT +1 (Nigerian Time)

Senior Category: 4pm - 5:30pm GMT +1 (Nigerian Time)

Time Commitment and Lesson Engagements

This is a 4-week engaging program

- A Google Classroom will be created for the camp where all students can interact with the instructors and among themselves on the topics learned in class.
- The training involves an in-class live (zoom) sessions of 90 minutes daily (the time will be communicated in the classroom before the camp begins) from Monday to Wednesday.
- There will be a 24/7 online support on the classroom to further help answers students questions.
- After each class, the students will be provided problem set to work on that will prepare them for the weekend exams. There will be 2 exams, with 2 weeks

interval between the exams. These exams will be administered on Saturday through Sunday.

- Students are to submit all homeworks and exams to the course instructor by taking a clear scan of their works ("cam scanner" from google playstore is advised). Information on how to submit the exams will be provided in the classroom during the camp.
- The student should purchase a sufficient data package, download zoom program (<https://zoom.us/download>) before the camp begins.
- At the end of the program, an electronic Gold, Silver and Bronze, Honorable Mention, Special prize and Participation Certificates will be awarded which will be determined by the cumulative scores of all the weekend exams written during the camp.

How to Enroll:

1. Click the Enroll button, then fill the form and complete your payment.
2. You will receive an email of confirmation of payment from contact@specialmaths.ng once your payment is verified within 24hours.
3. All other details on how to join the camp through zoom links, Google classroom code will be communicated in another email on 6th August 2022.
4. Any challenge regarding network issues during online payment or double payment, or inability to pay should be communicated to us via our WhatsApp and phone number at 08166444005.
